

DOS K-12 CRASH TEST - MAY 2004

United States Department of State

Washington, D.C. 20520

AUG 10 2004

Robotic Security Systems, Inc.
6530 Hwy. 22
Panama City, FL

Attention: Mr. Joey Blair

Dear Mr. Blair:

Based on the vehicle crash test at Pennsylvania Transportation Institute in State College, PA on May 13, 2004 and the evaluation of the PTI Test Report PTI 2004-17, Robotic Security Systems' Model RSS-2000 vehicle barrier has been determined to meet the Department of State (DOS) certification criteria for vehicle barriers.

Under the provisions of SD-STD-02.01, Revision A, *Specification For Vehicle Crash Test of Perimeter Barriers and Gates*, dated March 2003, the RSS-2000 has been certified as a K12 barrier.

The RSS-2000 will be placed on the DOS list of certified equipment that is available for use by architects and planners. Your product still has to compete with other bidding manufacturers who are certified with the same classification. We cannot guarantee that your product will be chosen by architects that design the facilities.

Thank you for your interest and endeavors in protecting our personnel and facilities overseas.

Sincerely yours,

Wayne Ashbery
Director
Physical Security Division
Bureau of Diplomatic Security
